

UKICRS

United Kingdom & Ireland Controlled Release Society

UKICRS Exhibition Workshop & Symposium

3–4 June 2019, Liverpool John Moores University, Liverpool, UK

The UKICRS committee invite your company to attend the 2019 United Kingdom & Ireland Controlled Release Society Exhibition Workshop & Symposium to be held in Liverpool John Moores University, Liverpool, UK on the 3rd and 4th June 2019. The main Symposium event will take place on Tuesday 4th June, with the Exhibition Workshop scheduled for Monday 3rd June.

As in previous years, the Exhibition Workshop event will comprise a series of short technical presentations that will provide company representatives the opportunity to advertise and demonstrate their products. Where appropriate, Workshop attendees are actively encouraged to bring samples for testing on the various equipment exhibited. The event offers a unique opportunity for companies to interact with potential end users of their products, including leading university researchers and industrialists from around the UK and Ireland. Previous Workshops have been a great success.

UKICRS offers two different packages for exhibition at the 2019 Exhibition Workshop & Symposium. Both packages include attendance of ONE company representative, ample floor space for exhibits, and the option to bring equipment for demonstration (subject to height restrictions).
